Tuesday 26th

2nd INTERNATIONAL ARCHITECTURAL PSYCHOLOGY CONFERENCE
INCLUDING C.I.E. STUDY GROUP A

Theme: NEW TENDENCIES IN LIGHTING RESEARCH

Sven Hasselgren, Professor
Section of Architecture
Royal Institute of Technology
100 44 Stockholm, Sweden

OPENING OF THE C.I.E. STUDY GROUP A

C.I.E. (Commission Internationale de l'Eclairage) has for a long
time had its International Congresses every fourth year. In 1967,
during the Congress in Washington D.C. the C.I.E. Board asked me
to establish a Study Group A, Psychological Problems of Lighting.
The intention was that this should become a forum for discussions
between the C.I.E. experts in physical problems, the Psychologists
as experts in perception, and the Architects as the people with
the task to create the Man-Made Environment.

Since 1967 C.I.E. Study Group A has had symposia every years. We
started in 1968 with a meeting that began in Copenhagen and
continued in Stockholm. In 1969 a Symposium was held immediately
after the first A.I.C. (Association Internationale de la Coloue)
International Congress in Stockholm. In 1970 a Symposium was held
in Kingston, in the outskirts of London, in connection with an
International Conference on Architectural Psychology. In 1971
the C.I.E. had its International Congress in Barcelona, and also
here the Study Group A had a Symposium of its own. In 1972 there
was a Symposium immediately after the U.I.A. (Union Internatio-
nales des Architectes) Congress in Varna, Bulgaria. In 1973 the
Danish Illuminating Engineering Society had a Scandinavian
Meeting in Helsingor, where the Study Group A was invited to have
a short Meeting. And in 1973 there is this International Conference
of Architectural Psychology which starts with a C.I.E. Study
Group A Symposium. Next time we will have such a Meeting will be
in Montreal in 1974, when the I.A.A.F. (International Association
for Applied Psychology) will have its International Congress.

The minutes from our Meetings have until now been forwarded to all
former delegates and other interested people. The chairman has
now a mailing list with about 200 addresses. This time, however,
it is by economic reasons not possible to fulfil this habit.
Interested persons will have to order the Minutes from the Lund
Symposium from Tekn Dr. Erik Kuller, who was the Secretary
for the total Conference.
